

ABOUT ME

Product Designer with 7 years of experience in B2B SaaS. I work at the intersection of users and business - investing in problem definition before jumping to solutions, keeping business goals equally in focus. I care about the people I work with as much as the product we build, and I use AI to move faster without cutting corners on quality.

Privately a gamer, Formula 1 fan and mountain hiker. I love to travel, run, play squash, draw and take a million photos of my Corgi.

SKILLS

Hard Skills

wireframing, prototyping, design systems, usability testing, user interviews, heuristic evaluation, AI-powered research, product thinking, accessibility (WCAG AA)

Soft Skills

cross-functional collaboration, stakeholder communication, mentoring, critical thinking, empathy, teamwork, openness, adaptability

Tech Stack

Figma, Claude, Lovable, Claude Code, Posthog, Clarity, Dovetail, Miro, Notion, Jira, Confluence

Languages

English (fluent), Polish (native)

Portfolio

edytasuprun.vercel.app

EDUCATION

2019 - 2020

Bialystok University of Technology

User Experience Design and Web Analytics, (Postgraduate Studies)

2014 - 2017

Bialystok University of Technology

Computer Graphics, BSc

WORK EXPERIENCE

Lead Product Designer | Localo

05.2024 – 06.2026

- Owned end-to-end discovery [17-person team, 5000 users]: user interviews, surveys, screen recordings, and event data - synthesised into clear problem statements and design direction
- Designed across the full fidelity spectrum - lo-fi to hi-fi prototypes and clickable flows - using AI tools to accelerate iteration before engineering investment
- Partnered with PM on OKR impact - hypothesis-driven, validated through A/B tests - shaping what the team built and chose NOT to build
- Built AI-powered research workflows: cross-referencing quantitative and qualitative data, analysing transcripts, and creating synthetic users for rapid feedback
- Owned developer handoff: authored design docs, resolved ambiguities, and ensured fidelity through design QA
- Collaborated with CS, marketing, and data analytics to build multi-perspective understanding of users and uncover product gaps
- Presented feature demos to marketing and CS; maintained team-wide alignment on user problems throughout delivery
- Led a 2-person design team - structured feedback, brainstorming sessions, and co-ownership of solutions

Senior UX / UI Designer | Codete

05.2022 - 04.2024

- Designed across multiple concurrent B2B SaaS products for enterprise clients (developer tools, data management platform, enterprise management platform)
- Built dedicated design systems from scratch - delivered information architecture, wireframes and prototypes from concept to implementation
- Conducted usability tests, identified key pain points, and translated findings into improvements aligned with user needs and business goals
- Presented and defended design decisions to stakeholders; collaborated closely with product owners and developers
- Supported and reviewed work of other designers across projects

UX / UI Designer | GoApps

freelance · 10.2020 – 10.2024

- Designed desktop and mobile applications across multiple client projects, working within existing component libraries and strict technical constraints
- Rapid lo-fi prototyping for early concept validation with clients - supported early-stage startups from initial product definition

UX / UI Designer | Ebrand Services

12.2019 - 04.2022

- Designed UX for an anti-counterfeit and fraud detection platform; delivered lo-fi to hi-fi wireframes and iterated based on user feedback
- Collaborated with product owner and developers to plan improvements and adapt solutions to technical requirements within agile sprints

Graphic Designer/Project Manager | Galaktus

03.2016 – 12.2019

- Designed digital and brand materials for gaming/electronics clients; led design and client coordination for CORSAIR stands at Poznań Game Arena 2016 and Intel Extreme Masters 2018
