EXPERIENCE

05.2024 – 06.2026

Localo

Senior Product Designer | B2B SaaS · Marketing · Local SEO

- Designed Localo, a local SEO tool. Owned the product end-to-end, from problem definition to release.
- Defined problems and product strategy, co-owned the roadmap with the PM, and tied design decisions to business goals.
- Ran user research and usability tests: interviews, surveys, session recordings, product data.
- Designed UX and UI, prototypes and user flows. After the Client Acquisition redesign, median session time on the feature rose from 4.0 to 7.3 minutes.
- Designed AI-powered features and AI research workflows: source data analysis, synthetic personas.
- Prepared handoff and implementation documentation and ran design QA; presented demos to stakeholders in customer success, marketing and analytics.
- Owned the design system: 80+ components, consistency, documentation, scalability.
- Mentored a junior product designer: scoping work, feedback, sign-off before release.

05.2022 – 04.2024

Codete

Senior UX/UI Designer | Telecom · Big data · Dev tools · B2B

- Designed 4 enterprise products end-to-end: discovery, research, information architecture, personas, flows, screens, prototypes, testing. Built 3 design systems from scratch. Collaborated with a China-based PM and two development teams, and led a team of up to 3 designers: scoping, feedback, sign-off.
- Sherpa – an internal management platform for an international telecom operator. 100+ views, several hundred users.
- Stargate – a tool for negotiating contracts and reconciling billing data between companies. Designed the data mapping between systems that replaced manual verification. Presented the result to an investor; the company secured its next funding round.
- Beehive – a tool for developers to plan deployments and oversee environments.
- Data analytics platform – designed the MVP in 3 months.

12.2019 – 04.2022

Ebrand Services

UX/UI Designer | Brand protection · Fraud detection · B2B enterprise

- Designed ARGOS, a platform for detecting counterfeits and brand-rights infringements online. Clients: brands in luxury, pharma, automotive, banking and gaming.
- The only product designer in a team of 6 developers and 2 testers; aligned design decisions directly with the COO.
- Owned the platform's UX and UI end-to-end, from wireframes to hi-fi mockups.
- Ran user research; every iteration was based on user feedback and technical constraints.

03.2016 – 12.2019

Galaktus

Graphic Designer / Project Manager | Gaming and electronics

- Produced digital and branding materials.
- Owned the CORSAIR booths end-to-end at Poznań Game Arena 2016 and Intel Extreme Masters 2018. Coordinated the East Games United event in Białystok.
