

EXPERIENCE

05.2024 – 06.2026

Localo

Senior Product Designer | B2B2C SaaS · Product Design · UX Strategy · AI-oriented

- Designed Localo, a local SEO tool. **Owned the product end-to-end**, from problem definition to release.
- Defined problems and product strategy, co-owned the roadmap with the PM, and decided where AI genuinely helps the user and where it just gets in the way.
- Ran **user research** and **usability tests**: interviews, surveys, session recordings, product data, RITE tests and A/B tests.
- Built **AI-assisted research workflows**: research synthesis, transcript analysis and synthetic personas for fast feedback rounds.
- Designed UX & UI, user flows and clickable prototypes in Claude Code and Lovable. After the client acquisition redesign, median session time rose from 4.0 to 7.3 min.
- Designed AI features**: a conversational assistant, generative post topics and automated competitor analysis in reports.
- Prepared handoff and implementation documentation and ran design QA; presented demos to stakeholders in customer success, marketing and analytics.
- Owned the **design system**: development, consistency, documentation, scalability.
- Mentored a junior product designer.

05.2022 – 04.2024

Codete

Senior UX/UI Designer | O→I Design · Enterprise · B2B · Design System

- Led a team of up to 3 designers** (scoping, feedback, sign-off) and mentored juniors.
- Built **4 design systems from scratch**: variables, styles, components, motion, documentation, logo and brand.
- Worked closely with **cross-functional teams** (Product Owner, development teams).
- Designed **4 complex enterprise B2B systems** (heavy data, deep object dependencies, role and permission models, multi-department IA):
 - Internal management platform: 100+ screens, several hundred users, 4 departments, role-based navigation and dashboards.
 - Contract & data reconciliation tool: cross-system field mapping, automated file comparison, mismatch negotiation, 25+ screens.
 - Developer tool: deployments, pipelines, environments, controlled releases, 7 connected areas, 50+ screens.
 - Data analytics platform: data lake ingestion, processing pipelines, catalogs, modeling, source and destination plugins, MVP in 3 months.

12.2019 – 04.2022

Ebrand Services

UX/UI Designer | Brand protection · Fraud detection · B2B enterprise

- Designed ARGOS, a platform for detecting counterfeits and brand-rights infringements online. Clients: brands in luxury, pharma, automotive, banking and gaming.
- Solo product designer** in a team of 6 developers and 2 testers; aligned design decisions directly with the COO.
- Owned the platform's **UX and UI end-to-end**, from wireframes to hi-fi mockups.
- Ran user research; every iteration was based on user feedback

03.2016 – 12.2019

Galaktus

Graphic Designer / Project Manager | Gaming and electronics

- Produced digital and branding materials.
- Owned the CORSAIR booths end-to-end at Poznań Game Arena 2016 and Intel Extreme Masters 2018. Coordinated the East Games United event in Białystok.

EDUCATION

2019 – 2020

Bialystok University of Technology

User Experience Design and Web Analytics (postgraduate programme)

2014 – 2017

Bialystok University of Technology

Bachelor degree in Computer Graphics

SIDE PROJECTS

GoApps – Assured Europe

Mobile app and back-office management system for car-rental companies. Deployed at all airports in Germany, Austria, Spain and the UK.

PlanujemyTo.pl

Desktop app for planning weddings, birthdays and christenings.

Kafejeto & Desejeto

Websites for a café, a coffee roastery and a patisserie.
